Animal Boarding

Organisation Size:
1-100

Location:
Staffordshire

Overview

Old Barn Boarding Kennels faced a critical challenge related to their IT infrastructure concerning Wi-Fi connectivity. The existing Wi-Fi network suffered from poor coverage and frequent dropouts, directly impacting essential aspects of their operations.

The CCTV system, crucial for ensuring the safety of both the premises and the dogs, was linked to this network. Additionally, phone calls relying on Wi-Fi were also disrupted, hampering smooth business operations. The need for a robust, reliable connectivity solution was evident.

What Fran Says about Zephi IT Solutions

Fran Kovacs
Owner at Old Barn
Boarding Kennels

“We were having issues with our CCTV system being intermittent, so we had planned to change the whole CCTV system. That was until Dom, from Zephi IT Solutions, came out and explained to us about Wi-Fi boosters. This was much cheaper than what we had expected to pay to fix the problem.

The guys were really great on site - nothing was too much to ask. The job was completed to a high standard. I would definitely use Zephi IT Solutions again in the future.”

Solution

At Zephi IT Solutions, we are renowned for our proficiency in providing comprehensive IT solutions. To tackle Old Barn Boarding Kennels problems, we started by conducting a comprehensive site survey to identify the root causes of the connectivity issues.

Based on the findings, we proposed a tailored design solution for Old Barn Boarding Kennels to get them a stronger connection and better security. We did this through the installation of renowned UBIQUITI access points, the deployment of CAT 6E Cables, and strategic positioning of equipment to ensure optimal and consistent Wi-Fi coverage throughout the premises. We utilised 35-metre-long cables to effectively extend the network.

Results

Connectivity

Security

Communication

The new infrastructure resolved the connectivity issues that were causing big headaches for the kennel. The CCTV system was back online, enhancing security, and communication became smooth and reliable.

Conclusion

Old Barn Boarding Kennels' experience with us at Zephi IT Solutions highlights the transformative impact our expertise can have on businesses facing connectivity challenges.
